

# HCL - 2000

## Air Pneumatic Coil Strut Spring Compressor

**Universal** : With Hercul 2000 S you can disassemble and re-assemble the shock absorbers Mc Pherson type, even the most difficult ones.

**Safe** : The system of hooking on the spring on four points assures the greatest stability in the compression process, because the effort is fairly distributed.

Hercul 2000 S is endowed with a protection system, i.e. a shield that prevents any kind of operations if not correctly positioned.

**Practical** : A basic peculiarity of Hercul 2000 S is the practicality, because it is of immediate utilization, without special shrewdness. Moreover it allows to operate with free hands.

**Fast** : Today the speed is very important. Hercul 2000 S is a time saving tool because compression and decompression is done very quickly.

**Reliable** : The choice of materials, duly tested and continuously controlled, make this apparatus staunch and reliable under every circumstance.

Model Type	Hercul 2000 S
Thrust Power	: 6 Bar - 670 Kg.
Operating Pressure	: Min. 5 - Max. 10 Bar
Height	: 117 cm
Width	: 47 cm
Length	: 45 cm
Packing Dimension	: 70x120x50
Weight	: 67 Kg (gross 82 kg)
Thrust Power	: 10 Bar - 1200 Kg.
